

You can now

Run sequential detailed routing on tiny_dr

Dual-track recap

- If you stayed in the browser, implement `astar_route` and `track_overflow` once in Python
- If you stayed in Track A, skim the track heat-map lab so colors match your usage dict

Pitfalls to remember

- Directed track keys, layer-aware moves, sequential order effects

Next

- Complete the quiz for this part
- Natural next steps are learn_compaction for post-route cleanup

Checklist

- Name three algorithms and one strength each
- Say which idea you reach for when sequential L overflows
- Pick your next course README

Close

- When you are ready, take the short quiz, then open the next course
